

LC Field Terminating Anaerobic Connectors, Multimode, 900 micron buffer, individual pack

Part No. 205KAN9GA-MM

Legrand quick-cure, anaerobic epoxy field-installable connectors speed installation time. Strip the fiber, inject the adhesive into the connector, insert and scribe the fiber, then polish the connector end face to perfection for a high performance termination.

Features & Benefits

Single mode or multimode: Simplistic offering reduces confusion with a one style connector that covers all multimode applications to include 62.5 micron, standard 50 micron, or laser optimized 50 fiber using an adhesive and primer for a secure, micron for 10 Gigabit transmission, and single mode

Reliable performance: Secure the installation of worry-free termination.

Minimal tools: A compact and economical tool kit contains all the common tools necessary to complete the termination.

Pre-radius LC: Minimal polishing and consistent end-face geometry resulting in more consistent optical performance

Specifications

General Info			
Product Line	Ortronics	UPC Number	662875607229
Country Of Origin	Mexico		
Dimensions			
Product Width US	1.25 in	Product Height US	0.36 in
