

Wattstopper
INFRARED EMITTER Stn w/RS232
Part No. IRX II

Infrared Emitter Station II (IRX II) is a simple solution for integration and control of A/V products.

Features & Benefits

Large driver library in Design Center software allows for easier third-party device integration

Integrates A/V and other systems using RS232 or IR

Can be connected to the system via Station Bus or Ethernet

Ethernet connection allows for IRX II to be located without distance limitations within a project

Can be used to extend RS232

Not for sale, resale, importation, installation or use in California

Specifications
