

Wattstopper Digital PIR 1-Button Wall Mount Sensor w/Infrared, White Part No. LMPW-101-W-U

LMPW-100 Series Digital PIR Wall Switch Occupancy Sensors use passive infrared (PIR) technology to detect occupancy for energyefficient control of lighting and plug loads. They also include one or two switch buttons for manual control of selected loads, and are part of a Wattstopper Digital Lighting Management (DLM) system

Features & Benefits

LMPW-100 Series Digital PIR Wall Switch Occupancy Sensors use passive infrared (PIR) technology to 1-button Digital PIR detect occupancy for energy-efficient control of lighting and plug loads. They also include one or two Wall Switch switch buttons for manual control of selected loads, and are part of a Wattstopper Digital Lighting Occupancy Sensor Management (DLM) system Passive infrared sensor with On/Off Component of Digital Lighting Management integrated control system button(s) to switch selected load(s) Quick access to Push n' Learn for system Digital sensor with LCD display and programming pushbuttons personalization IR transceiver for wireless Plug to other components using Cat 5e cables with RJ45 connectors eliminating wiring errors configuration and remote control

Specifications

General Info

Product Line	Wattstopper	Color	White
UPC Number	754182934225	Country Of Origin	United States
Technical Information			
Sensor Type	Occupancy	Amperage	8 mA
