Pass and Seymour Strain Relief Liquid-Tight Grips Part No. STB9075SF

90 deg male liquid tight for metallic flexible conduit. 3/4-inch npt. 3.875-inch Mesh length.

Features & Benefits

Liquid-Tight grips are woven of stainless steel mesh with zinc plated steel or malleable iron bodies and nuts for corrosion resistance.

Each fitting is supplied with an insulated throat to provide conductor insulation and protect against damage by flexing, heat expansion and contraction. They are used to connect liquid-tight flexible conduit to electrical enclosures to prevent conduit pullout.

Liquid-Tight grips are recommended in the wiring of motors and any electrical enclosure where liquid-tight conduit is subject to motion or strain.

Mesh Length: 4.375

Specifications

General Info

Technical In Capacity	formation Various Cable Diameter Ranges	Mounting	Consult the Factory for Mounting
CSA Listed	Yes	CSA File Number	67507
_isting Ager	ncies / 3rd Party Agencies		
tandard	UL/CSA Approval (consult factory)		
Construction	Various Types of Pulling, Support and Strain Relief Grips	Application Sector	Industrial
Product Line	Pass & Seymour	Country Of Origin	Mexico

	Strain Relief Grips are designed to prevent tension	
Load	from being transferred to junctions and terminals on	
LUdu	electrical cord, cable and conduit, therefore	
	providing a more secure electrical structure.
